

June 28, 2017

Ms. Arlynn Chugen
Administrator
FSM National Government Employees' Health Insurance Plan

Dear Ms. Chugen:

In planning and performing our audit of the financial statements of the FSM National Government Employees' Health Insurance Plan (the Plan) as of and for the year ended September 30, 2016 (on which we have issued our report dated June 28, 2017), in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, we considered the Plan's internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Plan's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting. However, in connection with our audit, we identified, and included in the attached Appendix I, deficiencies related to the Plan's internal control over financial reporting as of September 30, 2016 that we wish to bring to your attention.

We have also issued a separate report to the Board of Directors, also dated June 28, 2017, on our consideration of the Plan's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters.

The definition of a deficiency is also set forth in the attached Appendix I.

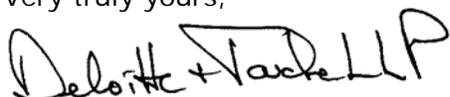

A description of the responsibility of management for establishing and maintaining internal control over financial reporting and of the objectives of and inherent limitations of internal control over financial reporting, is set forth in the attached Appendix II and should be read in conjunction with this report.

This report is intended solely for the information and use of the management, others within the organization, and the Office of the FSM National Public Auditor and is not intended to be and should not be used by anyone other than these specified parties.

We will be pleased to discuss the attached comments with you and, if desired, to assist you in implementing any of the suggestions.

We wish to thank the staff and management of the Plan for their cooperation and assistance during the course of this engagement.

Very truly yours,

SECTION I – CONTROL DEFICIENCIES

We identified the following deficiencies involving the Plan's internal control over financial reporting for the year ended September 30, 2016 that we wish to bring to your attention at this time:

1. Accounts Receivable

Comment: Tests of accounts receivable noted the following:

- Receivables from patient share increased by \$97,482 (or 34%) from \$288,991 at September 30, 2015 to \$386,473 at September 30, 2016.
- The allowance for doubtful accounts increased by \$109,347 (or 31%) from \$357,395 at September 30, 2015 to \$466,742 at September 30, 2016.
- Long outstanding receivable balances of \$349,943 did not move from prior year. Details follow:

Patient share receivable	\$ 246,184
Advances to officers and employees	4,883
Travel advances	16,741
Advances to others	82,135
	<u>\$ 349,943</u>

- Improper aging of accounts receivables

Recommendation: We recommend that the Plan strengthen procedures over collection and aging of receivables. The Plan should timely review and analyze long outstanding and nonmoving accounts and make necessary adjustments.

2. Medical Claims

Comment: Of seventy-seven medical claims tested, five had incorrect computations.

Recommendation: We recommend that medical claim calculations be examined on a regular basis to verify continuing accuracy.

3. Accounts Payable and Accrual

Comment: Two of twelve vouchers and other payables tested, and two of seventy-seven medical claims tested were prior year claims but were recorded as current year expenses.

Recommendation: We recommend that management implement policies and procedures requiring timely transaction recording and IBNR policies.

4. Preparation and Review of Financial Reports

Comment: All journal entries prepared and recorded during the year lack adequate review and approval. Further, interim FY2017 financial statements could not be provided.

Recommendation: We recommend that management implement procedure for the financial reporting process including review of journal vouchers and financial reports.

SECTION I – CONTROL DEFICIENCIES, CONTINUED

5. Adequacy of Documents

Comment: Invoices related to check#s 26528, 26621 and 25829 and one capitation agreement could not be provided.

Recommendation: Documentation should be on file to support all financial statement transactions.

6. Deposits with Service Providers

Comment: For two deposits with service providers totaling \$206,039, the bank confirmation or equivalent third party documentation was not available.

Recommendation: We recommend that the Plan obtain monthly bank statements or equivalent third party documentation for deposits with service providers. This was reported in our previous letter dated June 24, 2016.

7. Audit of Participating Employers

Comment: The Plan does not currently possess audit authority.

Recommendation: We recommend that the Plan request the FSM Congress to change the enabling legislation to allow the Plan to have audit authority in the same manner as the FSM Tax Office possesses for tax compliance. This was reported in our previous letter dated June 24, 2016.

SECTION II – DEFINITIONS

The definition of a deficiency is as follows:

A *deficiency* in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in operation exists when (a) a properly designed control does not operate as designed, or (b) the person performing the control does not possess the necessary authority or competence to perform the control effectively.

MANAGEMENT'S RESPONSIBILITY FOR, AND THE OBJECTIVES AND LIMITATIONS OF, INTERNAL CONTROL OVER FINANCIAL REPORTING

The following comments concerning management's responsibility for internal control over financial reporting and the objectives and inherent limitations of internal control over financial reporting are adapted from auditing standards generally accepted in the United States of America.

Management's Responsibility

The Plan's management is responsible for the overall accuracy of the financial statements and their conformity with generally accepted accounting principles. In this regard, management is also responsible for establishing and maintaining effective internal control over financial reporting.

Objectives of Internal Control over Financial Reporting

Internal control over financial reporting is a process affected by those charged with governance, management, and other personnel and designed to provide reasonable assurance about the achievement of the entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. Internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition may include controls related to financial reporting and operations objectives. Generally, controls that are relevant to an audit of financial statements are those that pertain to the entity's objective of reliable financial reporting (i.e., the preparation of reliable financial statements that are fairly presented in conformity with generally accepted accounting principles).

Inherent Limitations of Internal Control over Financial Reporting

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
