

SINGLE AUDIT OUTREACH PROGRAM

ONPA in recognizing the important role it plays in the administration of the single audit agreement, visited three State Governments and their respective component units from February to March of 2022. The focus of the outreach were on the role of ONPA regarding single audit, audit processes, challenges faced during the audit, and results of the analysis conducted for each entity based on the audit requirements of the previous contract term (FY2019-FY2021). The outreach will also assist ONPA in strengthening our monitoring role on single audits.
